

# Three Infamous Farm Laws in India and Motivational Forces Behind Farmer's Participation in Historical Protest: An Empirical Evidence from Haryana and Punjab State

**Usha Rani**

Assistant Professor (Economics), M.P. College for Women, Mandi Dabwali

**Abstract-** The formulation and enactment of three famous laws created resentment among farming community in some of the agricultural -based states of India and that in the end, did not take longer for farmers leadership to get succeed in to propose plan of action that proved very convincing in bringing thousands of farmers together to settle down in makeshift camps installed at different borders of Delhi. These were focused on and aimed at proving the arguments that were put forward by sect of academia were not based on logics but imaginary and devoid of evidence. The arguments against the laws were given that if big corporations are allowed to play free in the market, it may defunct and spoil the Indian agricultural market in no loss of time. So, the farmers had to take roads and highways to raise their voice that generated enthusiasm among farmers and other workers associations that eventually opened vistas for joint mass protest and brought agreements among more unions other than farming to unite to raise voice in solidarity to get three farm laws repealed. The present paper tries to study the motivational forces working behind their participation. To achieve the stipulated objectives, a primary-data based study was conducted in Haryana and Punjab state which had the majority of protesters staging protests at Delhi borders. A Total of 280 farmers were selected randomly from Haryana and Punjab State by selecting 140 farmers each from both of the states who spent at least 15 days at Delhi borders. Garret ranking were used to extract results.

**Key Words:** Lockdown, Enactment, MSP, Procurement Price, Essential Commodities

## 1. INTRODUCTION

2020 is characterised by misfortunate intense impact of coronavirus and lockdown in the world. Besides covid-19, India was preparing itself to another very complex and serious challenge also that took place in the garb of a very giant and strong agitation by Farming community. The agitation had its roots in the enactment of three farm laws by the present dispensation of India, National Democratic Alliance (NDA). That move of the Government was presumed to be taken covertly and almost stealthily in the excuse of Covid-19 when these laws in point were passed by Indian Parliament and eventually approved by president of India on 27 September, 2020. The Farmers Produce Trade and Commerce (Promotion and Facilitation) Act, Farmers (Empowerment and Protection) Agreement of Price Assurance and Farm Services Act, and The Essential Commodities (Amendment) Act were thrown as a big reform for Indian agriculture sector but received non-acceptance and became a greater cause for resentment among farming community of India. The arguments put forward to support these laws stated these laws as most instrumental in raising farmers income and profitability by raising market and price efficiency.

Besides farming community, the forming of laws raised concern with academia world also and provoked a very serious discussion and criticism. The present study revolves around the objectives related to knowledge of farmers about three infamous farms laws and the dominance of farmers at the protest site. Except to it, the motivational factors have also been examined in the present study.

## 2. STIPULATED OBJECTIVES OF THE STUDY

- 1) To know the level of Knowledge of farmers about Three Farms Laws and related terms.
- 2) To find out the motivational force behind participation and most instrumental factor in the farmer's protest

### Results and Discussion

The furnished results related to the stipulated objectives have been presented through following heads:

#### Knowledge about Terms/Act

Regarding their knowledge about various terms that are relevant in regard to farmers laws, it was found that in Haryana and Punjab state, a majority of the protesters are aware about the term minimum support prices as 73.2 per cent farmers in Haryana have

knowledge about MSP while that of remained as 69.2 per cent in Punjab state. It was also observed that some percentage of the participants of the protest was found to have some idea about MSP. But it was also revealed that farmers were not found aware about procurement prices irrespective of the state as a large chunk of farmers replied in negative when they were asked about procurement prices. The percentage of participants who do not have knowledge about procurement prices was remained higher in Punjab in comparison to Haryana. As far as three infamous laws are taken into consideration, it was essential commodities act about which participants farmers were observed to have knowledge in comparison to rest of the two farms laws in Haryana whereas in Punjab, participants farmers were found more aware about Farmers (Empowerment and Protection) agreement on Price Assurance and Farm Services for Agriculture Act, 2020.

Source: Field Survey

of the view that the laws were sufficient to deprive them of their land while that per centage were remained as 64.4 per cent in case of Punjab. The second most negative factor which made the farmers aggravated was the apprehension that the farm laws would ultimately wipe out their minimum support prices.

Regarding discarding farm laws, it was found that a majority of farmers were of the view that the laws were formulated to give advantage to big corporation and the interest of the farmers were not taken into account during the formulation of the law. Non-involvement of the stakeholders was also remained a determined factor.

### Most Instrumental Factor in Farmers protest in Haryana (Garret Ranking).

Regarding most significant factor of the farmers protest, it was found that social media/freelance journalist was identified as the most significant factor in farmers protest in Haryana while farmers leadership was given second rank closely followed by help received from gurudwara which was ranked as third

**Most Instrumental Factor in Farmers protest in Punjab**

Garrett's Ranking Technique was used to reach the results for finding out the most important factor in farmers protest regarding Punjab respondents summed up in table 4.2. (B). It is revealed by the findings of the study that maximum mean score representing the most instrumental factor which played major role to win this war has been leadership in Punjab state. Besides, Support from Gurudwara/NGO and social media/ freelance journalist were played very important role for ensuring positive results for the protesters as these factors were ranked as second and third. The farmers shared that when mainstream media was working against them it was only the unconditional help from social media, youtubers, freelance journalist who helped them to provide them wide coverage and spread their message in mother tongue and local dialect and helped the farmers to understand the pros and cons of three farm laws and the discussion/ debate covered by social media and other different platform youtubers which

was being done during this protest were proved significant to win this war.

**Dominance in Farmers Protest**

It is revealed from the study that each and every farmer confirmed the fact that it was the protest of all farmers that includes large, land-owning farmers, small farmers, all caste farmers. Besides, they shared that it was not only leadership that dominated but decision-making power was decentralised and all the decision were taken unanimously. It was not the particular caste or land holders who was dominating the protest. Even the persons do not have land came together to show their solidarity with protesting farmers. It the protest which attracted the Indian currently residing in foreign countries. even if a person does not have land but their father or grandfather had farming history came forward to support the farmers as they feel connection with farming and felt a sense of belongingness as they saw their father or grandfather as farmer.

(Figures in Percentage)

Sr. No.	Particulars	Haryana	Punjab
I	Large Farmers	0	0
II	Landowning farmers	0	0
III	Small Farmers	0	0
IV	Upper Caste	0	0
V	Kisan Leadership	0	0
VI	Panchayats	0	0
VII	Political Parties in Opposition	0	0
VIII	All Farmers	100	100

Source: Field Survey

**Conclusion**

It was revealed through the study that most of the farmers from Haryana and Punjab were remained aware about the term MSP. It was also revealed that regarding information about the possible negative impacts of three infamous laws, the source for maximum per centage of participant farmers were remained the media. It was also highlighted through the study that the fear of losing their land made the farmers to jump into the battle with the existing

regime. Regarding most significant factor of the farmers protest, it was found that social media/freelance journalist was identified as the most significant factor in farmers protest in Haryana while farmers leadership was given second rank closely followed by help received from gurudwara which was ranked as third. Regarding Punjab State, it was revealed by the study that maximum mean score representing the most instrumental factor which played major role to win this war had been leadership in Punjab state. Besides, Support from Gurudwara/ NGO and social media/ freelance journalist were played very important role.
